Personal Vision & AI Research Summary

Name: Guelord KB

Date: July 23, 2025

Purpose:

This document serves to introduce myself as a new team member at Red Face Company, outline my vision and goals for the future within the organization, and present research on a large language model (LLM) AI tool to demonstrate my understanding and how it can enhance my productivity and creativity in this role.

Section 1: Personal Introduction and 5-Year Vision

Who am I?

My name is Guelord KB, and I come from a strong background in the hospitality industry. I've spent several years managing the full flow of restaurant operations — from kitchen activity to customer service, ensuring everything runs smoothly and efficiently. Through this experience, I've developed an instinct for understanding customer needs, optimizing operations, and solving problems in real-time.

I'm also a naturally creative person. I love music, nature, and I have a strong spiritual side, all of which inspire creativity in my life. I believe creativity is not limited to art or music, but is also essential in problem-solving, teamwork, and innovation — all skills I aim to use in this company.

My Interests & Skills

- Creative Thinking
- Customer Service & Flow Management
- Team Leadership & Coordination
- Computer Literacy

- Social Media Management
- Strong Communication Skills
- Learning from Others

My Passions

I'm passionate about progress, growth, and spreading joy. I get excited about building something that has impact, and I believe working at Red Face Company gives me the opportunity to contribute meaningfully.

Where Do I See Myself in 5 Years?

In five years, I see myself as a key leader within Red Face Company. I want to build and lead a high-performing team that consistently delivers excellent service. I envision a team so impactful that our work speaks louder than any marketing — customers are so impressed, they talk about us without even being asked.

What Are My Professional Goals While Working Here?

- Understand how the entire business operates — from back-end to front-line.
- Improve my leadership and team-building skills.
- Contribute creative ideas that push the company forward.
- Be a valuable team player in sales, partnerships, and customer relations.
- Be known as someone who adds consistent, reliable value.

How Do I Plan to Achieve These Goals?

- Daily Learning: Stay open to learning something new every day from the team, our leaders, and our work environment.
- Idea Sharing: Regularly write down and share ideas during team meetings.
- Action-Oriented: Turn ideas into action plans — even small actions matter.
- Team Strategy: Help create a strategy where we approach at least 200 businesses a day as a team.
- Follow-Up and Feedback: Follow up with leads, improve based on

feedback, and adjust my approach.

- Consistency & Creativity: Consistently work with energy, passion, and a creative approach to challenges.

Section 2: AI LLM Research Summary

What is Claude?

- Name: Claude
- Created by: Anthropic
- First Released: 2023
- Named After: Claude Shannon
- Purpose: A safe, helpful, and ethical large language model.

How Does It Work? (LLM Basics)

LLMs like Claude are trained on massive text datasets to learn patterns in language. They generate human-like text by predicting what comes next in a sentence. Claude uses Constitutional AI to stay ethical, safe, and aligned with human values.

Unique Features or Strengths Compared to ChatGPT

- Focuses on ethics and safety
- Handles longer documents better
- Excels in creative writing
- Emphasizes user privacy

How I Can Use Claude in My Role

Productivity:

- Summarize reports and meetings
- Draft client emails
- Organize insights from data

Creativity:

- Brainstorm campaigns
- Generate slogans and ideas
- Inspire marketing efforts

Content Creation:

- Create social media posts
- Write blogs and bios
- Draft proposals

Automation:

- Automate thank-you messages
- Create outreach templates

Research:

- Market trends
- Competitor strategies
- Customer insights
